Fear loves the night

Loves the night

Sunrise fear

Hold me closer

Sky is blown

Sky is blown

Fear; wild my spirit

Has no allies

Fusion

Here in my head

Dream everything

Making you beg

For mercy my friend

Down on your knees

Leaning my head against your head

It's a matter of conscious for you

That you did what you did

Just like the way you were

Never going down

Cos I'm never going back again
