## The Girl Who Fell to Earth

## **Gaz Coombes**

The girl who fell to earth She gets her kicks from science It's hard to see, it's not enough When you're blinded by computer love So tear it down and play it rough You don't mean to mess it up How I wish we could start over You wear your elastic heart on your chewed up sleeve First you cry and then you laugh You're like a circle, cut in half Another night of broken sleep I'll comfort you, I'll warm your dreams But you've still got time, my warrior child When the storm starts it's only on the outside At times we couldn't see the light We only wipe our tears dry I know you're there, I know it's you The girl inside is breaking through The girl who fell to earth
