

For Anita

Gazebo

For Anita I have lost my mind
Never knew that I could be so blind
For Anita took me by the hand
Made me understand
Gave me sympathy to lead me through the night
Gave me energy to cope it through the light

Today together
The future's on the way
One love forever
In a deep blue day

For Anita I lived in a box
Made me free like in a paradox
For Anita was intelligence
She was elegance
Gave me harmony to make it through the mess
And a family to make me feel careless

Today together
The future's on the way
One love forever
In a deep blue day
