Sun Goes Down on Milky Way

Gazebo

Dancing all the night, one and only sight
Mephistopheles has got my soul for some promises
All the girls and boys, animals and toys
They can't understand insanity
They say I'm out of it, and I can just admit

The sun goes down on milky way
And I touch your velvet face
Moon is high on milky way
And I love you forever

Counting all the days, Voodoo laws and plagues
And Dictatorships that tried to stop me from loving you
Shaking jungle beat, burning desert heat
And the freezing ice I crossed for you can't affect me now
I love you anyhow

The sun goes down on milky way
And I touch your velvet face
Moon is high on milky way
And I love you forever

The sun went down so long before
I could reach for your embrace
Moon is high beyond the sky
But my hope is forever

A moonlight rendez-vous with you
Why don't we do it
A moonlight rendez-vous with you
Why can't we do it till the morning light comes out
