

Ease Your Mind

Gazpacho

The time we spend on living lives
Working day breakfast goodbyes
It isn't really you or me
Living these lives eternally

The man that's on my business card
A woman trying all to hard
To find something that she can feel
Well none of them are really real

Alive and wild and frightening
Just like a shooting star
Is how I really see you
When you've turned on all your charm

The little things we talk about
When you're in my arms and the lights are out
Your voice a current in the air
I feel it charge the atmosphere

You say it's getting harder
You say it's getting cold
With everything and nothing
The universe grows old

Tonight we're going to take a ride
And park the car by the seaside
And sit there on the beach and watch the tide
We can say the things we need to say
Beneath clouds of electric gray
And no-one's allowed to say they have to go

Let's go back in time
When you knew me
Live it through me
Ease your mind

Tonight we're going to take a ride
And park the car by the seaside
And sit there on the beach and watch the tide
We can say the things we need to say
Beneath clouds of electric gray
And no-one's allowed to say they have to go

Ease your mind...
