

## Novgorod

## Gazpacho

White pearls are cast upon the ground  
The drum inside my chest still pounds  
Somewhere in this dark ancient sea  
"From stars and sunken stone"  
A wave reached up like mercury  
"You are not alone"  
This phosphorous light a mystery  
"Hear my voice so deep inside"

Help me  
Someone help me  
Transparent face  
Against the waves

Come rest and sleep here  
with the tide  
Hear my voice echo your cries  
In sandcastles on an endless beach  
Let the water dry your tears

Help me  
Someone help me  
Transparent face  
against the waves

So far away won't you come close  
Just like me a lonely ghost  
A shadow of myself  
that only you can see  
See me  
You can't run, you can't hide  
I am a mirror your other side  
Look into my eyes

Run from me and you will die

Help me  
"I am what you need"  
Someone help me  
"Here beneath the reef"  
Transparent face  
"Look into my eyes"  
Against the waves  
"Here beyond the shore"

Help me...
