

Out in the dark where the shadows can't find
You don't look around cos there's someone behind you
If you don't shake them off, you'll never be free
Control the fear and you get an energy

Running through the night
Driving till the day breaks
Staring at the sky
Whatever time it takes
Whatever time it takes

Rain beats hard but the wipers work harder
Emotional truckstop close to the border
Condensation forms on the inside of windows
Open them up and feel the wind blow

Running through the night
Driving till the day breaks
Staring at the sky
Whatever time it takes
Whatever time it takes

I chose to live my life this way
I chose to reject and to stray
I choose to forget yesterday

I got a choice - have you?

In and out of sleep; time stands still
Black coffee comes and gets a refill
Endless cigarettes they leave a bad taste
Groundhog night rewind get spaced

Running through the night
Driving till the day breaks
Staring at the sky
Whatever time it takes
Whatever time it takes
