

Choices

Gemini Syndrome

I hope you know how much I love you
As much as in my life as in my death
I would give you everything I have
I would give you my last breath

I could never leave you
And I'd die alone
But if you choose to walk away from me
You choose it on your own

The evidence has shown...

History's a teacher
No one ever learns
It can rest assure me
The sun burns

I could never leave you
And I'd die alone
But if you choose to walk away from me
You choose it on your own

My atrocity
Is that I don't care
About the apathy
What was once there...is gone
So so long...

I apologize
For what I couldn't do
I focused on the prize
Focused on the prize
And I forgot you

You mean everything to me
You're the only thing I see
You mean everything to me
You're the only thing I see
You mean everything to me
You're the only thing I see
You mean everything to me
You're the only thing I see
You mean everything to me
You're the only thing I see

You mean everything to me

I could NEVER leave you
And I'd die alone
But if you choose to walk away from me
You choose that on your own

Sorry that I love you
I wish I didn't have to
