

'Cause you're lost in front of me
It's true I'm losing you
(2x)

And you know it's over
When you're going down
Take everything and live for the moment
It's only gonna bring you down tonight

When you're locked up in my view
It's true, I love you
When you're locked up in my blue
It's true, I love you

And you know it's over
When you're going down
Take everything and live for the moment
It's only gonna bring you down

Bring you down (3x)

When I'm lost I'll come to you
So blue, I'm feeling you
When I'm lost I'll come to you
I'm blue, I feel you

And you know it's over
When you're going down
Take everything and live for the moment
It's only gonna bring you down

Bring you down (3x)

And you know it's over
When you're going down
Take everything and live for the moment
It's only gonna bring you down tonight
(2x)
