

# Time to Share

Gemini

It's getting hard to tell  
The months from weeks  
But I can still remember few you whispered me  
And we'll separated by a thousand dreams  
If I'd be listening closely you'd be singing in the wind  
Uuuh uuuh uuh uuh uuh uuh,  
And I can hear you sing  
Uuh uuh uh

Igniting in our voice  
And I cannot sleep  
I see those stars reflecting  
Like diamonds out of reach  
And I know you're the one, the only one for me  
So, I'll take the roads that bring me home  
Fly safely eventually

And we'll have all the time to share  
All the time to share, all the time to share  
And we'll have all the time to share  
All the time to share, all the time to share  
All the time to share  
I'm just one second  
You're just one breath away

Soon I'll hunt your smiles  
And tears that speak  
All the thousand lonely faces  
Down in million empty streets  
And on the chorus looks nice  
No, I won't risk us somewhere in the distance  
As a flame now burns for me

And we'll have all the time to share  
All the time to share, all the time to share  
And we'll have all the time to share  
All the time to share, all the time to share  
All the time to share  
I'm just one second  
You're just one breath away

Uuuh uuuh uuh uuh uuh uuh  
I just won't stand away  
I just won't stand away from you, from youuu uh uh uh

And we'll have all the time to share  
All the time to share, all the time to share  
All the time to share  
I'm just one second,  
You're just one breath away  
And we'll have all the time to share  
All the time to share, all the time to share  
All the time to share  
I'm just one second,  
You're just one breath away

I'm just one second,

You're just one breath away  
And we'll have all the time to share  
All the time to share, all the time to share  
All the time to share  
I'm just one second,  
You're just one breath away  
All the time to share.
