

Half light

Gemma Hayes

turn in half light softly silence surrounds us
uncertainty always drives you from me

but it is you that i want
for it is you that i know
calm me down

sickness can feel twisted and full of beauty
the sweetest knife will draw out a bitter ending for us
but it is you that i want
for it is you that i know
break me down

it's always the same, i'm as right as rain
it's always, falling on your head
it's always the same, it'll never be the same again
i'm as right as rain

but it is you that i want
for it is you that i know
but it is you that i need
calm me down
