

# I Know An Ending

Gene Watson

I never thought that you'd be leaving me  
And even now it's so hard to believe  
But even the blind at times can see the sun  
And at least I know an ending when it comes

I may have missed a lot of things you said  
I know most of them went right overhead  
But with all my heart I know this song's been sung  
And at least I know an ending when it comes

How long ago did you start leaving me?

How long have I lived with a memory?  
I may have missed it when you first begun  
But at least I know an ending when it come

I never thought that you'd be leaving me  
And even now it's so hard to believe  
But even the blind at times can see the sun  
And at least I know an ending when it comes

Oh, at least I know an ending when it comes
