

# Make Sure You Got It All

Gene Watson

I'm watching you go from room to room  
With all your boxes and your broom  
Picking up, sweeping out and taking down  
From off the wall  
Everything that's part of us  
Tear my whole world down, if you must  
Don't even leave one little speck of dust  
Make sure you've got it all

Take my heart, take my soul  
And take it all with you when you go  
Just leave the floor  
Here to catch me when I fall  
You stole my pride and dignity  
You took it all away from me  
Take one last look around, girl, before you leave  
Make sure you've got it all

Don't even leave one photograph  
The memory of one smile or laugh  
Check the closets, up in the attic  
And down the hall  
Take your time, take your rings  
Take the sandbox and the swings  
Without a family, they're just things  
Make sure you've got it all

Take my heart, take my soul  
And take it all with you when you go  
Just leave the floor  
Here to catch me when I fall  
You stole my pride and dignity  
You took it all away from me  
Take one last look around, girl, before you leave  
Make sure you've got it all  
Take one last look around, girl, before you leave  
Make sure you've got it all
