

# I Love You, What Are You?

Gene

I can see everything around me  
My eyes are as good as the day I was born  
And I see you're trying to steer a straight path  
I love you, what are you?  
Come clean and laugh with me  
The home that you never had  
Could be here in my arms  
You must see  
I will not move, I will not move  
Until the love you never had  
Firm and strong in my hands  
Your love for lies is no alibi  
Life goes on and so must you

Oh everything around me  
My eyes bright and clear as the day I was born  
As a rule, you try to keep your nose clean  
I love you, what are you?  
In dreams I've seen  
That the home that you never had  
Could be here in my arms  
You must see  
I will not move, I will not move  
Until the love that you never had  
Firm and strong in my hands  
Your love for lies is no alibi  
Life goes on and so must you
