

Save Me, I'm Yours

Gene

Don't turn the light off and leave me
This bed feels cold and empty
The ghosts will come and get me
Won't you please stay here I'm scared
I need you to save me I'm scared
So sorry to be trouble
But this room is like a gaol
In the arms of love all fail
Won't you please stay here I'm scared
I need you to save me I'm scared
Don't turn the light off and leave me
Without love I am empty
You're the only one who'll have me
So won't you please stay here I'm scared
I need you to save me I'm so scared
