

Why I Was Born

Gene

Love is no more than this
And all from your tatty kiss
Never alive until twenty five
You can have all I know
It's not much but it's all I know
Never alive until twenty five
If you ask me to
I'll say to you I do
I really want to show you I love you
I now know why I was born
My vision is clear
You've killed all my fear
Don't let me go
Don't let me go
The world we now stand astride
Just watch and we'll halt the tides
Never alive until late twenty five
And all the world which hates
Anything delicate
Never alive until twenty five
If you ask me to
I'll say to you I do
I really do want to show you I love you
I now know why I was born
My vision is clear
But there's something in here
Screaming don't let me go
Don't let me go
