

# The Succulent Aftermath Of a Subdural Hemorrhage

General Surgery

A lustful necrophiliac your carcass i explore  
Your suppurating remains i happily deplore  
Lymphatic runny fluid is a sight i cant resist  
Ichorous reeking juices i extract from numerous cysts  
Skull a spongy mass your profile inconsistent  
Ears reduced to taps a flood of red liquefaction  
Brain reduced to sludge sanguinary feast  
Coagulating waste i gorge myself on pus  
Lacerated organs make me shiver to the bone  
Whipped into a frenzy i fillet suck and groan  
Memorize then masturbate bloody soaked and ravaged  
I scoop you into bags a reeking pile of garbage
