

Keep It Low

Generacionals

Your voice on the phone, keep it low
Your voice on the phone, keep it low
Your voice on the phone, keep it low
Keep it low

If you want to stay I will put you up
I've been in the shadow you are in now
At the dusk of the day, have I done enough
To tell myself I didn't really let you down?

In my haste to follow you
I got tortured for what I done
Found my faith in solitude
Now I don't talk to anyone

Your voice on the phone, keep it low
Your voice on the phone, keep it low
Your voice on the phone, keep it low
Keep it low
Your voice on the phone, keep it low
Give us something we can sway to
We get a lot of the day to
We got loud in the day too

Anyone can see they got a piece of us
It's better to be metal than diaphanous
Fall into a pattern of ambivalence
And calcify your heart

In my haste to follow you
I got tortured for what I done
Found my faith in solitude
Now I don't talk to anyone

Your voice on the phone, keep it low
Your voice on the phone, keep it low
Your voice on the phone, keep it low
Keep it low
Your voice on the phone, keep it low
Give us something we can sway to
If I learned a lesson from living alone
Maybe I can find another pagan to pray to
We got a lot of the day to

Your voice on the phone, keep it low
Your voice on the phone, keep it low
Your voice on the phone, keep it low
Keep it low
