

Cover your eyes with your hand
Breathe in and start to count
Footsteps fade out as you run
Search all you like now I'm gone
Harshness all words overcome
Left to the warmth of the sun

Caught between the flames, try explain that I'm through
I wanna be apart been trying so hard to hide from you
Caught between the flames, try explain that I'm through
I wanna be apart been trying so hard to hide from you

Restless you'll cry to cold
The wind through the trees leaves you raw
Wait 'til the calls disappear
Now further apart feels too near
Fortune aside, I'll be there
In sunlight the darkness should clear

Caught between the flames, try explain that I'm through
I wanna be apart been trying so hard to hide from you
Caught between the flames, try explain that I'm through
I wanna be apart been trying so hard to hide from you

Try as I might, fairly clear, I can't live without what you fear

Caught between the flames, try explain that I'm through
I wanna be apart been trying so hard to hide from you
Caught between the flames, try explain that I'm through
I wanna be apart been trying so hard to hide from you
