

forever!

Gentle Bones

All the shit that I've been through
Feeling like I made it through against the world
But I'm always on the run

When you're all alone then with a friend
It's so hard to play pretend
I might be broken but it's something like

I'll say it, if I'm taking too much
It's 'cause I just can't quite ever get enough of you
If I'm coming in a little bit, little bit too strong
I'm sick and tired of holding up my walls
I've waited forever

I really wanna, really wanna know, know you better than before
So take the time you need
I can do, we can do anything that you wanna
But if everything's too sweet and slow
Tell me what you need to know

Now we're in the flow, baby
You'll see
Better in the zone with me than bougie
I just let go of what we could be
How do you love me better than me?

Stare at you as you're using your phone
Forgot what it's like on my own
'Cause you know I know that it's love
So baby, let's put in work

Baby, life's just begun
If you really want it to
You looked me in the eyes said "I do"
So if I could fly for a minute, fly with you
It's in the clouds, it's just us two

I really wanna, really wanna know, know you better than before
So take the time you need
I can do, we can do anything that you wanna
But if everything's too sweet and slow
Tell me what you need to know
What you need to know

Let's both get out the spiral
Getting so tired fiending for tomorrow

Let's both get out the spiral
Getting so tired fiending for tomorrow

If I'm taking too much
It's 'cause I just can't quite ever get enough of you
If I'm coming in a little bit, little bit too strong
I'm sick and tired of holding up my walls
I've waited forever
I've waited forever
