

Something's Missing

Geographer

I feel something's missing
I feel

Time reaches in my pocket
Tells me I should understand
I don't know why
I don't even try to stop it
'Doing the best I can
With our backs out
Searching for each other
You were only in my head
If we hit the ground
Don't let me recover
The days are long
But soon we'll be together again

You oh oh oh
Runnin' like a song stuck in my mind
And all I wanna do is sing along this time

'Cause I feel something's missing
I got all the right friends in all the right places
Still you just won't listen

Time running up behind me
Tells me he's my only friend
If I go blind
I need someone to remind me
Who or what I am
With the lights out
Changing with the weather

Following the master plan
If we hit the ground
Baby we know better
The days are long
But soon we'll be together again

You oh oh oh
Runnin' like a song stuck in my mind
And all I wanna do is sing along this time

'Cause I feel something's missing
I got all the right friends in all the right places
Still you just won't listen
I feel something's missing
I got all the right friends in all the right places
Still you just won't listen

I feel something's missing
I feel

I feel something's missing
I got all the right friends in all the right places
Still you just won't listen
I feel something's missing
I got all the right friends in all the right places

Still you just won't listen
