

Wonder Gently

George Clanton

Something in the way that you're talking
Something in the way you walk to me
Makes me wonder gently

Something in the way that you're talking
Something in the way you walk to me
Makes me wonder gently

Something in the way that you're talking
Something in the way you walk to me
Makes me wonder gently

Something in the way that you're talking
Something in the way you walk to me
Makes me wonder gently

Something in the way that you're talking
Something in the way you walk to me
Makes me wonder gently

Something in the way that you're talking
Something in the way you walk to me
Makes me wonder gently

Something in the way that you're talking
Something in the way you walk to me
Makes me wonder gently

Something in the way that you're talking
Something in the way you walk to me
Makes me wonder gently

Something in the way that you're talking
Something in the way you walk to me
Makes me wonder gently

Something in the way that you're talking
Something in the way you walk to me
Makes me wonder gently

"Damn that was too long"
Maybe you can write your own song and listen to it all alone
"Man you're taking it wrong"
Take it from me I don't care at all
Here's your drum, here's your bass
Stay in your fucking place
Don't say shit to me
You look dumb with that smile on your stupid face
Everyone can't get along
Don't you know?
Don't you know?

Don't you know?
I know what I'm doing

I know what I'm doing
(Wonder gently)

(Wonder gently)
I know what I'm doing
Don't say shit to me
(Wonder gently)
