

# Underground Angel

George Clinton

Standing on the earth's stratosphere  
That's what I really do  
When I stay aboard the mothership  
When I head up high to the sky  
Then I dedicate you a song, and you get it

There's a girl uptight that you don't like the funk  
And you don't like to boogie with her  
Nobody knows how to solve the problem  
There's a party in the neighborhood  
I think about that maybe they get funky  
The mothership was gettin' ready for the next trip  
But I've moved here to the party to the save the funk  
'Cause I'm an angel landed to the underground

Baby, pretty little angel  
Come here to rescue me and take me underground

Hey what's your name, man?  
My name is knee deep, tales of kidd funkadelic  
America eats its young  
Cosmic slop, hardcore jollies  
Maggot brain, one nation under a groove  
Check out my shit, haven't you had enough of it?  
The electric spanking of war babies  
Uncle jam wants you  
Standing on the verge of gettin' it on  
Do you want a little more?  
Let's take it to the stage

Baby, pretty little angel  
Come here to rescue me and take me underground  
Baby, pretty little angel  
Come here to rescue me and take me underground

I love your funk, I do like it  
I want the funk playing like a G.I. Joe  
I've got to boogie all day  
So what would you like to do, so let me know  
The neighborhood party broke the ground  
So what would you like to do, so let me know  
And caused ground vibrations all around  
And crashed the house roofs like dinosaurs on glass  
So like I've said before

Baby, pretty little angel  
Come here to rescue me and take me underground  
Baby, pretty little angel  
Come here to rescue me and take me underground

I do like the funk, I do like it  
I want the funk playing like a G.I. Joe  
I've got to boogie all day  
There's a party in the neighborhood, it will last until night  
It makes me feel like dancin' all day  
The neighborhood party will break the ground  
And cause ground vibrations all around

And crash the house roofs like dinosaur on glass  
So like I've already said before

Baby, pretty little angel  
Come here to rescue me and take me underground  
Baby, pretty little angel  
Come here to rescue me and take me underground  
Baby, pretty little angel  
Come here to rescue me and take me underground  
Baby, pretty little angel  
Come here to rescue me and take me underground
