

Second Time Around

George Jones

Darling look what you've done to my life the change is plain to
see

You took each part of this broken heart and made a new man of m
e

When I thought that all was lost just look at what I've found
You're living with what love can do the second time around

Mistakes I made in my younger days and times that passed seemed
high

But the bridge I've burned was a lesson I've learned and I get
it right this time

I'll be the man you see in me and I'll never let you down
You gave my heart a brand new start the second time around

Every dream I ever dreamed and my first one to come true
I've never heard more sweet words than when we said I do
And when it's all said and done if this old world let's me down
God above will bless our love the second time around
God above will bless our love the second time around
