

Feel It

Georgia

It's hard to explain
We feel it, we feel it
Hands to hands again
When we feel it, we-we feel it
Little boy, take time
Let your mind not go too fast
'Cause then they'll make you run, run, run
'Til your heart fills up
And you don't want that
You wanna feel it

But you can't stop us now
You're all alone
Woah

And they say things shatter
But it's the things that matter
Now go away, so go away
Now they say things shatter
But it's the things that matter
Now go away, so go away, now

I know it's hard to explain it
And you're just trying to make it
But these motherfuckers all up in your face
With these sorry-ass excuses
And acting like you basic, ain't it
Funny how it all goes down?
Do it for the money, it'll all go south (South)
Just a little girl taking time trying to find herself
So I guess they make me wanna go now
Baby, I can tell you they're running away, bottling up all your pain
But that ain't the way to change it
Baby, you can start right now and turn it all around
You just gotta do some rearrangements
But you don't want that
No, you wanna
Feel it (Feel it)

And they say things shatter
But it's the things that matter
Now go away, so go away
Now, they say things shatter
But it's the things that matter
Now go away, so go away, now
Now they say things shatter (Hey)
But it's the things that matter (They say)
Now go away, so go away (Go away, go away, go away)
Now, they say things shatter
But it's the things that matter (Go away)
Now go away, so go away, now (So go away, now)
