Evolution

Geowulf

You're far too young to father a son
I'm much too lost to have one
A dream of a child as only kids ourselves
A test proved all clear that day on the highway

I wanted your children
I wanted your children
It's probably only evolution
Our bodies over reason

Exasperated by the lengths we hurt ourselves
We had no way to make it work
In another life you'd be brave and I'd be kind
We meet only when we were older

I wanted your children
I wanted your children
It's probably only evolution
Our bodies over reason

Goddamn, we went a little crazy
Thinking that we should have a baby
I thought your love was gonna save me
Biology went and made a fool of me

I wanted your children
I wanted your children
It's probably only evolution
Our bodies over reason
I wanted your children
I wanted your children
