

Work In Progress

Geowulf

I haven't lost myself completely
My shoulders ache from bone to bone
And I haven't fallen off the wagon
But this time, I'm on my own

So I take a bow
The sentence handed out
And I'm moving on somehow

We fill the space
But maybe for the best
We talk, we talk a little less
We've been brave
But baby, hold your breath
Our love's a work in progress

I must have lost control of my mind
I used to feel so free
And I haven't felt this strong in a long time
Thank God I'm off my knees

So I take a bow
The sentence handed out
And I'm moving on somehow

We fill the space
But maybe for the best
We talk, we talk a little less
We've been brave
But baby, hold your breath
Our love's a work in progress

We fill the space
But maybe for the best
We talk, we talk a little less
We've been brave
But baby, hold your breath
Our love's a work in progress
Our love's a work in progress
