

## You've Got What I Like

Gerry and the Pacemakers

Your smile can make the darkness turn to light  
Your eyes make gold and silver not so bright  
Your hair's as soft as a summer night  
You've got what I like

You say the things I always wanted to  
You walk just like an angel out of the blue  
And when you hold me, my life starts anew  
You've got what I like

You've got the kind of lips I long to kiss  
And when we go on dates now, endless bliss  
You make a desert island come to life  
You make the whole wide world seem free from strife  
You are the one I'm gonna make my wife  
You've got what I like

You've got the kind of lips I long to kiss  
And when we go on dates now, endless bliss  
You make a desert island come to life  
You make the whole wide world seem free from strife  
You are the one I'm gonna make my wife  
You've got what I like, you've got what I like  
You've got what I like
