

Silence

Get Scared

Fuck this shit, put a bullet to my head
You're never gonna wanna see my face again
I quit taking all that I came with
You couldn't take it or the way I lived
I'm sick, sick
A sad heart you could never fix
You're heartless
I saw it in the end
This won't last forever, take it back to the day that we first
met
Do you even remember what we were up against?
Consequences speak louder when said through your teeth
Silence is everything
Careless, felt like you came and went
To never be seen again, I don't regret it
Baggage cut out the merriment
Crawled till my fingers bled, and I must confess
I'm sick, sick
A sad heart you could never fix
You're heartless
I saw it in the end
This won't last forever, take it back to the day that we first
met
Do you even remember what we were up against?
Consequences speak louder when said through your teeth
Silence is everything
Thought you'd got away, handing me escape
Saved me from mistakes I'd make before it was too late
Forgetting you was easy
This won't last forever, take it back to the day that we first
met
Do you even remember what we were up against?
Consequences speak louder when said through your teeth
Silence is everything
Oh, yeah
Not this time
Fuck your life
