

# Us In Motion

## Get Scared

Wide awake and bound  
I am searching till I'm found  
Along the way rebuilding  
What I've thrown away  
Listen to that sound  
You can feel it shaking up this town  
And I know  
I'm not waiting anymore

We are in for the long run  
We're all just getting by  
Without a sign  
Looking for the nearest place to hide  
We are in the for long run  
You gotta open up your eyes  
You're out of time  
Don't waste it on something you can't define  
Stop waiting all your life

Careless and loud  
I will scream it from the clouds  
Miles away  
I wont rest until I've reached my grave  
Always wanting more  
See I've been up and down that road before  
And I'm here to say you're not alone

We are in for the long run  
We're all just getting by  
Without a sign  
Looking for the nearest place to hide  
We are in the for long run  
You gotta open up your eyes  
You're out of time  
Don't waste it on something you can't define  
Stop waiting all your life

When you've got no place to go  
I want you to know  
Its your time  
Its your world  
And you must grab a hold and take control  
When there's no place to call home  
I want you to know  
Its our time  
Its our world  
Let's say goodbye for those who doubt us all

Wide awake and bound  
I am searching till I'm found  
Along the way rebuilding  
What I've thrown away

We are in for the long run  
We're all just getting by  
Without a sign  
Looking for the nearest place to hide

We are in the for long run  
You gotta open up your eyes  
You're out of time  
Don't waste it on something you can't define

Stop waiting all your life  
Stop waiting all your life  
Stop waiting all your life
