

What If I'm Right

Get Scared

They'd love to call the search off
For me to go away
Just sweep me under the rug
Then no ones takes the blame
They wanna fill my head up
And scare me half to death
And when I bought what they want
I'm there with nothing left

How can you stand up and say
With a straight face
That nothing's wrong with me
That nothing's wrong with me
I don't think they've got a clue about what's best
For anybody else except themselves

I've got a bad bad feeling overwhelming me
What if I'm right? What if I'm right?
I've got a bad bad feeling overwhelming me
What if I'm right? What if I'm right?

They ask me why I'm nervous?
Why I appear so tense
The pills offset each other
So I'm not making sense
Give me one more dosage
To cure dependency
If I could ween myself off
You'll never hear from me

How can you stand up and say
With a straight face
That nothing's wrong with me
That nothing's wrong with me
I don't think they've got a clue about what's best
For anybody else except themselves

I've got a bad bad feeling overwhelming me
What if I'm right? What if I'm right?
I've got a bad bad feeling overwhelming me
What if I'm right? What if I'm right?

Paranoia, mass delusion
Stay confused and in the dark
Someday things will change
Self-destruction, debt consumption
Fear cannot control us all
Blinded by your greed
But we will make you see
The factories are burning
The medication fades
My lungs are finally open
And I can finally sleep

I've got a bad bad feeling overwhelming me
What if I'm right? What if I'm right?
I've got a bad bad feeling overwhelming me

What if I'm right? What if I'm right?
