

# Crazy Over You

Get Set Go

Close your eyes and go to sleep  
I like to watch you while you dream and  
Wonder if you are any happier  
You work the day and through the night  
And that just doesn't seem quite right  
I think that you deserve to be much happier

If there's a song that I could sing  
Some sort of melody  
That might get you to smile  
To turn you on to me  
Something that I could do  
That might get through to you  
That might get you to smile  
Something you used to do  
Cause sweetheart it's so true  
I'm going crazy over you

Another wicked argument  
Has left us bent and broken and  
Bitterly resentful of each other  
The things we say that break my heart  
Even as I play a part in  
murdering the couple that we used to be

If there's a song that I could sing  
Some sort of melody  
That might get you to smile  
To turn you on to me  
Something that I could do  
That might get through to you  
That might get you to smile  
Something you used to do  
Cause sweetheart it's so true  
I'm going crazy over you

Can it be over?  
We've only just begun  
(We're done, we're done, we're done)  
Say it's not over  
Cause sweetheart, i'm in love  
(We're done, we're done, we're done)  
Let me come over  
Cause I still want you  
(We're through, we're through, we're through)  
What am I to do?

Close your eyes and go to sleep  
I like to watch you while you dream and  
Wonder if you are any happier  
You work the day and through the night  
And that just doesn't seem quite right  
I think that you deserve to be much happier

If there's a song that I could sing  
Some sort of melody  
That might get you to smile

To turn you on to me  
Something that I could do  
That might get through to you  
That might get you to smile  
Something you used to do  
Cause sweetheart it's so true  
I'm going crazy over you
