

# I Just Wanna Die

Geto Boys

[Soft talking:]

What can we do with all this fucking pain  
Somebody stop the pain

[Singing:]

I finally look to paint a picture of my whole life  
And for me to end it would be so nice  
Somebody driving on this back street  
So I could leave my shit all on the back seat  
Cause I don't love my life no more  
So I don't wanna fight no more  
I felt this way before but it died out  
So I shot my fucking eye out  
Nobody understands me help  
But I don't understand my self  
I always find myself bein trapped  
And my drugs that I take so I'm at  
That point in my motherfuckin life  
Where I don't wanna live a fuckin lie  
I just wanna die

[Chorus:]

I just wanna die  
Die  
I just wanna die  
Die

Let's go on a journey  
Boldly go where no man has gone before

[Verse 2:]

Buckle up and lets take a ride  
I want you to watch me commit suicide  
We're headed for a place in a dark land  
In desperate search of that dark man  
But don't you move keep it right there  
I wanna bring you smooth into my nightmare  
Don't be afraid of watching life bleed  
Explore my every thought, come out and sightsee  
There's no man alive, that can promise breath  
But once we arrive, I can promise death  
And now were headed for the crossroads  
Gettin deeper in the lost coves  
And once we arrive  
Close your motherfuckin eyes  
Cause I'm about to die

[Skit:]

Will wake up  
"what, what, what, what man? damn you ain't been listenin man?  
This shit is real, man, I don't give a fuck will, you payin attention  
"just drive nigga, damn? you listenin, will it's goin down, right fuckin now

I put the pistol to my temple

See the bullet in the chamber  
Cocked it back and out of anger  
I pulled the crack, see the shells jump out the side  
Now I'm fallin back, I'm seein faces but they're all in black  
I'm hearin sounds but I cant hear  
I'm seein pictures in my head but they ain't clear  
My every picture flashed at full speed  
And now I'm feelin like I'm loosin my grips on all reality  
But my reality's a battle g  
And I was tired of havin talks with myself about mentality  
End it all I stand tall apparently I wasn't patient enough to hear the man  
Call  
So now I leave myself to strive or die, but I've lost all my hopes inside,  
And I just wanna die

Yo will wake the fuck up,  
"what, what, what, man, damn? man I'm talkin about killin myself man  
"wanna kill yourself? ? that's right I don't give a fuck  
"aight? what you think I'm playin  
Argument.....gunshot.....car crash
