

Forget It

Getter

You can just move over now
You never came around
Never came around
Never came around
You can just forget it now
You never came around
Never came around
Never came around

And if you must come my way
I would put you back in place
And if you must come my way
I would put you back in place
When you're broken
Or when you're slowly breaking down
And when you're sorry
I said I'm sorry to let you down

You can just move over now
You never came around
Never came around
Never came around
You can just forget it now
You never came around
Never came around
Never came around
