

## Guiding Lights

Ghost

If I could pause right here  
I would open my heart  
And tell you with no fear  
That the path we have walked led us into the dark

There stood my god before me  
Do you know what they said?

That the road that leads to nowhere is long  
And that those who seek to go there are lost  
The guiding lights (lights), they lead you on  
And the road that leads to nowhere is long

If I could turn around  
I would've told you the truth  
It could've found its way  
Through the powers that be  
I just want you to see

There stands our god before us  
Can't you hear them saying?

That the road that leads to nowhere is long  
And that those who seek to go there are lost  
The guiding lights (lights), they lead you on  
And the road that leads to nowhere is long

That the road that leads to nowhere is long  
That the road that leads to nowhere is long  
That the road that leads to nowhere is long  
That the road that leads to nowhere is long
