

## All Is in Sync

Ghost Atlas

So long my only friend  
Hello to another new beginning  
That I don't want to begin again  
I can't come down

There is nothing left for us to sing about

You come on over and set me free (Ooh)  
You come on over and set me free (Ooh)

In my own head I find my escape  
All is so clear  
But it is so much better here  
With you my dear

There is nothing left for us to sing about (but what lies ahead  
)

You come on over and set me free (Ooh)  
You come on over and set me free (Ooh)  
You just come on over and over  
I've loved nothing more

I worry all the time  
I miss my old ways  
In creative isolation  
But every day you save me  
Of all the things that I have loved well  
I have loved you better

I have loved you better  
I have loved you better

You come on over and set me free (Ooh)  
You come on over and set me free (Ooh)  
You just come on over and over  
I've loved nothing more
