

# Shadows

## Ghost Machinery

Fogs descending on the deserted streets  
Darkness is on the rise  
Here all alone with my misery  
No looking back no thinking twice

I find the answers from your hollow words  
Straight from the heart that's growing cold  
Where's the place I could end my search  
My treasure island the silver and gold

Pale is the light  
That shines on my weary face  
Just look the state that I'm in  
Slipped from the path  
And we're lost without a trace

Learn the lesson and learn it well  
Don't turn your back don't walk away  
Face the evil and you will live to tell  
And to fight another day

No shortcuts home and no easy ways  
On broken wings I have to fly  
True emotions will show on my face  
No matter how hard I try

Pale is the light  
That shines on my weary face  
Just look the state that I'm in  
Slipped from the path  
And we're lost without a trace

Shadows across my face  
Deepest emotions will never change  
Shadows across my face  
Deepest emotions will never change

Right is wrong and wrong is right  
You changed the day into a night  
Warm is cold and black is white  
The battle is won before the fight

Pale is the light  
That shines on my weary face  
Just look the state that I'm in  
Slipped from the path  
And we're lost without a trace

Shadows across my face  
Deepest emotions will never change  
Shadows across my face  
Deepest emotions will never change

Never surrender  
I'm no pretender  
Shadows rising  
Just run and hide

Pale is the light  
That shines on my weary face  
Just look the state that I'm in  
Slipped from the path  
And we're lost without a trace

Shadows across my face  
Deepest emotions will never change  
Shadows across my face  
Deepest emotions will never change
