

Mother Of Peril

Ghost of the Robot

You make yourself an enemy
But you can't escape Reality

And everything that's gone away from gone...

If it's all the same
I'll take all the blame
So shame on shame

And everything that's gone away from gone
Can be resurrected in a song
And for every wrong that wants to belong
You can now all sing along

Oh, here I go again listen
Hear this chosen
Now in this moment
Know show, now that I own it
I'm the expert of this experience

To explain all my ex's that's what always perplexes...

Oh, here it goes again listen
Hear it chosen
Now in this moment
Know show now that you own it
You're the expert in this experience
Don't explain all your ex's that's what always perplexes...

We never really know
Oh, When it's time to go

Can we live
Happy ever after disaster shifts matter?
Beauty can't see feeling so we sing...
