

Find Myself

Ghost Town

I've always felt like we could do this on our own and call it home
We tipped the scales and turned the tides we didn't hide, we didn't hide
I got lost to find myself
Dug so deep but just found hell
these shattered dreams like fragments
Stuttered thoughts attract me like magnets

I know we'll do this on our own

What are we going to do?
I'll fight it til I find myself
What are we going to do?

I'll fight it til I find myself
I'll fight it til I find myself

What are we going to do?
I'll fight it til I find myself!

I hope you know
I hope you know that we're ready
Take on the world straight and steady
Now we're moving forward not regretting, all the people we've left behind
Let's do it right the next chapter
Live happily ever after!
Die happily ever after!

I know we'll do this on our own

What are we going to do?
I'll fight it til I find myself

What are we going to do?
I'll fight it til I find myself

I'll fight it til I find myself
I'll fight it til I find myself
What are we going to do?
I'll fight it til I find myself!

All of the blood sweat and tears
That Built up through the years

even though were back at square one
It's still nice to know where we come from

Now that we've opened our eyes
Leaving all of our mistakes behind

My intuition is my weapon that steps in
My Sixth sense is all we need to succeed

I know we'll do this on our own..

I'll fight it til I find myself
I'll fight it til I find myself

I'll fight it til I find
I'll fight it til I find

I'll fight it til I find myself
I'll fight til I find myself
Find myself!
Find myself!
Find myself!
