Ghostemane

Hold up

Wait a minute, do I gotta say whatever you want me to say?

Wait a minute, wait what?

Do you really want me to say to you when you're literally in the middle?

Of you telling me what to think

Telling me what to

(Be, don't even think about looking in my vicinity)

You're telling me what to think, what to fucking think

(Why don't you just leave me to die?

Why don't you just leave me to die?)

Who the fuck you talking to?

Really don't give a fuck about the fame

Only give a fuck if you remember the name
