

I'ma K-R-double E-P lurking in the back row  
Sick of giving a shit so I ain't sick no more  
But the demons in brain  
They won't leave me alone  
I try to block them out but they taking control  
I'm a dirty young kid with no daddy and a donk  
I used to have love now I ain't got no soul  
When I dream I see my body in the bed when I float  
To another place and I can't get back home  
I'm levitating on no fake cause God never shows  
Soon as I see Miami covered six feet in snow  
Bitches think I'm going ghost but I'm just scheming on the low  
I'ma antigravity my way to your brain then explode

When I say oogabooga  
Motherfuckers gon' jump  
Exorcism in the back of the red donk  
I'm taking over your soul like I'm Shang fucking Tsung  
Grab a hold of your face  
Listen to the base bump  
When I say oogabooga  
Motherfuckers gon' jump  
Exorcism in the back of the red donk  
I'm taking over your soul like I'm Shang fucking Tsung  
Grab a hold of your face  
Listen to the base bump

When I astral project my way into the plane  
Illuminated but I waited too long  
A little bit of wasted time I'll never get back  
Think back to the time when I got it all right  
Like a carnival in my mind  
Kicking it alone cause I don't need shit  
Got a chick with a bun and she sucking me dick  
Motherfucker don't know shit  
You talking like you got a PA in legit  
But everybody know that I'm the king with my ears closed  
I still wouldn't pay no attention if you was blaring through a  
pair of Bose
