Ghostemane

A-N-T-I-I-C-O-N, no one on my level

Keep on believing, you been believing in a lie  
Everybody depending on me, I don't know why  
Barely made it out of my bed, why do I try?  
I said I never told a lie, but I did when I told you that I was  
doin' just fine

Red blood, somethin' I don't really care for  
Let it all run wild like it's meant for  
Fake love, somethin' I don't really care for  
Let it all hang out, find me another motherfucker  
Who ain't an overrated fabricated A.I

I said a lie when I said I'm fine

Anti-everything you love  
Love-drunk, numb from the waist up (Please stop)  
Pain loss, thank God and please don't (Please don't)  
Pray let him prey on the brain, don't let him eat  
If that's an icon, that'll never be me (Yeah)

Anti-everything you  
Anti-everything you  
Anti-everything you  
Anti-everything you (Fuck yeah)  
Anti-everything you  
Anti-everything you  
Anti-everything you

(Anti-everything you)  
(Anti-everything you)
