

Bitch I been keeping it low key
Leave me 'lone don't bother me
You call me and I let it ring
You wasn't with me when I was nothing
Don't pretend like you know me
Think again I'm never comin' back no way
Let me put kerosene all on my past and let it all go up in flames
Bitch I be low key
Leave me 'lone don't bother me
You call me and I let it ring
You wasn't with me when I was nothing
Don't pretend like you know me
Think again I'm never comin' back no way
Let me put kerosene all on my past and let it all go up in flames

I feel like giving up giving up
Drop out of life and I'm done
Every day blend in to one
I don't remember the feel of the sun on my face
I keep waking up waking up
Fuck everything and I'm gone
I got some blood on my grandma floor
But it was a new knife and a new girl
Take a look in the mirror and remember me
See that cut on your shoulder and think
I am the one that fucked you up on a spiritual level
Remember to breathe
You came cried and then came and then cried again I was the knight at your feet
Take everything and then rip it apart at the seams
Now I'm falling down the rabbit hole rabbit hole
Someone gonna find me or not?
Is someone gonna find me alive?
I keep on falling am I gonna die?
Keeping my head on a swivel
I'm watching my back cause I know
All those that hate are so miserable
Trying to take everything that I own

Bitch I been keeping it low key
Leave me 'lone don't bother me
You call me and I let it ring
You wasn't with me when I was nothing
Don't pretend like you know me
Think again I'm never comin' back no way
Let me put kerosene all on my past and let it all go up in flames
Keeping it low key
Leave me 'lone don't bother me
You call me and I let it ring
You wasn't with me when I was nothing
Don't pretend like you know me
Think again I'm never comin' back no way
Kerosene all on my past and let it all go up in flames
