

**Vs.**

**Ghoti Hook**

You see our face  
And know our name  
By the way we hold our stare  
One look at us  
It's obvious  
That we don't even care

We've been around your kind before  
You sit around the place  
And all you ever do is run your mouth  
We'll rock as you walk out the door  
But cant you hear the crowd?  
They're screaming they want more

We grind your nerves  
As you salute  
The make up of our band  
And your choice words  
To bring us down  
Match the finger in your hand

We've been around your kind before  
You sit around the place  
And all you ever do is run your mouth  
We'll rock as you walk out the door  
But cant you hear the crowd?  
They're screaming they want more

(crowd screaming)

We've been around your kind before  
You sit around the place  
And all you ever do is run your mouth  
We'll rock as you walk out the door  
But cant you hear the crowd?  
They're screaming they want more  
Woah woah woah woah!
