

Flashlights

Giant Rooks

Uh, alright

Where do I start? Where do I begin?
I try to let it all sink in
Before it slips away like a dream
Summer passed and autumn came
The world outside was turnin' grey
Most people aren't what they seem

Swimmin' with sharks
They circle all around me
Sniffin' my blood
And patrollin' every corner of my mind

My eyes point inside just like flashlights
Searchin' every corner of my mind
Memories collide, flickerin' flashlights
Searchin' every corner of my mind

The more I think the less I seem to know
If this is where I wanna go
Don't take it away from me
Winter passed, flowers grew
What am I supposed to do?
I'm still caught up in-between

Swimmin' with sharks
They circle all around me
Sniffin' my blood
And patrollin' every corner of my mind

My eyes point inside just like flashlights
Searchin' every corner of my mind
Memories collide, flickerin' flashlights
Searchin' every corner of my mind

A world of mirrors, psychopaths
Sunken dreams and A.I. friends
I don't care 'bout what they say
Tranquilizers, culture wars
Some have found a bigger cause
I don't care 'bout what they say
(I don't care 'bout what they say)

Search for answers on the Internet
Happiness slips through my hand
I might, yeah, I might
Go and find some peace of mind
But nothing's ever gonna change
God won't help me win this game
I don't care 'bout what they say
I don't care 'bout it today

My eyes point inside just like flashlights
Searchin' every corner of my mind
Memories collide, flickerin' flashlights
Searchin' every corner of my mind

(My eyes point inside just like flashlights)
(Searchin' every corner of my mind)
(Memories collide, flickerin' flashlights)
(Searchin' every corner of my mind)
