

Two Worlds Collide

Giant

You've been searching for a love that's burning
To find a heart that's true
Your head's been spinning like a planet drifting
There's nothing left you can do

Just when you least expect it, it's right there in front of you

When two worlds collide, hit by a first attraction
The beat of two hearts out of control
When two worlds collide, you can't escape the reaction
Ready or not, you take your best shot
Two worlds collide

She seems you coming; she knows you've been running
She's been there before
It's now or never, a love that's forever
It's what she's looking for

Just when you think it's over, it's right there in front of you

When two worlds collide, hit by a first attraction
The beat of two hearts out of control
When two worlds collide, you can't escape the reaction
Ready or not, you take your best shot
Two worlds collide

Feel the passion, feel your heart pound, tering you apart

When two worlds collide, hit by a first attraction
The beat of two hearts out of control
When two worlds collide, you can't escape the reaction
Ready or not, you take your best shot
Two worlds collide
