

Midnight Blue

Gideon

Can you feel it
Pulling you closer?
Closer to the end

A voice in the void
Darkness is calling
What choice but destroy
When all becomes nothing
Lacerations to the bone
My soul leaves home
Through time and space, I'm falling

Cold
Cold and alone
Silence is gold, until you're left
Cold
Cold and alone
Silence is gold until you're left, bitch

This emptiness I feel in this solitude
The loneliness that I wish I never knew

Midnight blue
Howling at the moon
Midnight blue
Fighting with the wolves

Setting fire to my demons
Fill my lungs up with ghosts
Silence is gold until you fall
Falling through space, falling through time
And when you fall
Remember the face of death
And the taste of blood

Taste of blood
Taste of blood
Bittersweet, straight from the cut, let it run

Cold
Cold and alone
Silence is gold until you're left
Cold
Cold and alone
Silence is gold until you're left

Midnight blue
Howling at the moon
Midnight blue
Fighting with the wolves
