

Burning Star

Gigi

Turning all the night time
You should be done these days
Don't let your feeling lonely
You just try to getting star

No, no, no
You'll be leaving all these life
They might think you're crazy
You just the way you are

Why are people crying
They cry about this world
And you just still do not know
What you could do for them

Baby, baby, baby
Please just walk down the street
Why don't you make it easy
Don't let you mess your brain

You can't change this world oh baby
But you can change your life oh darling
And everybody will know baby
You're the burning star
