

# Talk!

## Girlfriends

You've been running, running, running your mouth around town  
We used to say I love you but not right now  
You've been taking all our business and tryin' to air it out  
I don't care what it's all about, you should probably cut it out

Someone told me last night  
A secret that you could not hide  
You just can't quit the gossip  
Even if you tried

All you do is talk  
Behind my back, you just talk  
I wish your mouth had a lock  
Try to forget it but it's hard to ignore  
You say you're sorry then you do it some more

You just talk  
Behind my back, you're all talk  
And you don't know when to stop  
Like what the hell are you still doing it for?  
You say you're sorry then you do it some more

You got problems  
Yeah, you got issues  
You're the worst I've had to listen to  
Thank God I got rid of you  
I got all this scar tissue  
'Cause I haven't processed what I've been through  
Miss me with 'I miss you'  
'Cause I'm never gonna miss you

Someone told me last night  
A secret that you could not hide  
Just can't quit the gossip  
Even if you tried

All you do is talk  
Behind my back, you just talk  
I wish your mouth had a lock  
Try to forget it but it's hard to ignore  
You say you're sorry then you do it some more

You just talk  
Behind my back, you're all talk  
And you don't know when to stop  
Like what the hell are you still doing it for?  
You say you're sorry then you do it some more

All you do is talk
