

Standing with you  
Less than a breath apart  
Under the moon  
And Jupiter too

The way that we move  
It's like I was made for this  
Moment with you  
The stars think so too

Baby, let's make our own universe  
Slow dance our way through the night  
Thinking of words no one's ever heard  
So won't you just hold me cause I'm so in love with you, I

Cause I never want to leave  
Got everything I need in this planetarium with you  
So easy to be right here  
Got everything I need in this planetarium with you

The man on the moon  
He might have touched space  
But he never knew  
How a kiss felt from you

Baby, let's make our own universe  
Slow dance our way through the night  
Thinking of words no one's ever heard  
So won't you just hold me cause I'm so in love with you, I

Cause I never want to leave  
Got everything I need in this planetarium with you  
So easy to be right here  
Got everything I need in this planetarium with you

Baby, let's make our own universe  
Slow dance our way through the night  
Thinking of words no one's ever heard  
So won't you just hold me cause I'm so in love with you, I

Cause I never want to leave  
Got everything I need in this planetarium with you  
So easy to be right here  
Got everything I need in this planetarium with you
